Education

Veermata Jijabai Technological Institute (VJTI), Mumbai **2025 – Present**
Bachelor of Technology in Computer Engineering *CGPA: 7.35/10*

Sanjay Ghodawat Institute, Kolhapur **2022 – 2025**
Diploma in Computer Science and Engineering *94.91%*

Kodoli High School, Kodoli **2022**
Secondary School Certificate (SSC) *94.20%*

Experience

BharatCares – Lenovo LEAP NextGen Scholar Program (AICTE) **Jun 2026 – Jul 2026**
Generative AI & Agentic Systems Engineering Intern (Virtual)

- Completed a 6-week internship focused on **Generative AI** and **Agentic Systems Engineering** through technical sessions and hackathons.
- Explored **AI agents, prompt engineering, Generative AI**, and intelligent application workflows through project-based activities.

IT Revolution, Kolhapur **May 2024 – Jun 2024**
Web Technologies Intern

- Developed web applications using **HTML, CSS, and JavaScript**, applying frontend development and responsive design concepts.
- Gained hands-on experience with **VB.NET** and explored basic **C# backend development** and database-driven applications.

Projects

Campus Assistant AI Agent | *Botpress, Generative AI, Conversational AI*

- Developed an AI-powered **campus assistance agent** using **Botpress** to provide students with campus-related information and services.
- Designed conversational workflows, intents, and knowledge-based responses to handle student queries through an interactive chat interface.

Deepfake Video Detection System | *Python, PyTorch, TensorFlow, OpenCV, EfficientNet*

- Developed a deep learning system to classify video content as **real or deepfake** using facial frames extracted from videos.
- Implemented **video preprocessing, facial-frame extraction, dataset preparation, model training, and evaluation** using OpenCV and deep learning models.

TryOnX – AI-Based Virtual Try-On Platform | *React, TypeScript, Tailwind CSS, Flask*

- Developed an AI-powered **virtual try-on web application** for visualizing clothing on user images.
- Built the frontend using **React, TypeScript, and Tailwind CSS** with a **Flask** backend for image processing and AI integration.

Authenix – Voice & Face Authentication System | *React, Python, OpenCV, Firebase, MariaDB*

- Developed a **multimodal biometric authentication system** combining facial recognition and voice authentication for identity verification.
- Implemented face recognition and voice verification with **React, Python, OpenCV**, and integrated Firebase and MariaDB for authentication and data management.

Carbon Emission Calculator | *Python, Flask, SQLite, HTML, CSS, JavaScript*

- Built a web application with **role-based authentication** to calculate, monitor, and analyze carbon emissions with user dashboards and reports.

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, SQL, VB.NET, C# (Basic)
Web: HTML5, CSS3, React, Tailwind CSS, Flask, REST APIs
AI/ML: PyTorch, TensorFlow, OpenCV, Computer Vision, Deep Learning, Generative AI, Botpress
Databases: SQLite, MariaDB, Firebase
Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Android Studio, LaTeX
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Computer Architecture

Achievements & Activities

- Secured **94.91%** in Diploma in Computer Science and Engineering (MSBTE) and achieved **100/100 in Digital Techniques**.
- Awarded **Student of the Year** in high school.
- Winner of the **Zonal Chess (Girls) Competition** and **First Prize** in Umang 2K23 Chess Competition.
- Secured **First Place** in college-level **Box Cricket and Kho-Kho** competitions.
